

List of Figures

1.1	The Greenhouse Effect	1
2.1	Canadian Energy Production, 1995	8
2.2	Canadian Primary Energy Demand, 1995	8
2.3	End-Use Energy Demand by Sector, 1990 and 1995	9
2.4	Canadian Energy Trade, 1995	11
2.5	Secondary Energy Fuel Shares, 1990 and 1995	13
3.1	Canada's Greenhouse Gas Emissions, by Gas, by Sector, and by Fuel/ Source, 1995	20
3.2	Trends in Per Capita Carbon Dioxide Emissions and Gross Domestic Product, 1990-1995	21
3.3	Canada's National Greenhouse Gas Emission Inventory, 1995	22
4.1	Greenhouse Gas End-Use Emissions, 1990-2020	37
4.2	Fossil Fuel Production Emissions and Initiatives Impact	38
5.1	NRCan's Forecasting Process	42
5.2	The Gap: 1990-2000	47
5.3	Greenhouse Gas Emissions, 1990-2020	48
5.4	Greenhouse Gas Emissions by Sector, 1990-2020	49
5.5	Impact of Initiatives on Greenhouse Gas Emissions, 1990-2020	49
5.6	Greenhouse Gas Emissions by Province, 1990-2020	50

List of Tables

1.1	Changes in Concentrations of Key Greenhouse Gases Since Pre-Industrial Times	2
2.1	Average Annual Heating Degree-Days in Cities in Canada and Other Northern-Latitude Countries	6
2.2	Changes in Canada's Greenhouse Gas Emissions and Related Factors	7
2.3	Changes in Major Emissions-Related Indicators, 1990-1995	11
2.4	Factors Influencing Growth in Secondary Energy Use, 1990-1995	13
3.1	Greenhouse Gas Emission Estimates in Canada by Sector, 1990-1995	19
3.2	Global Warming Potentials of Various Greenhouse Gases	22
3.3	Canada's Greenhouse Gas Emissions from Energy Sources, 1990-1995	24
3.4	Emissions from Bunker Fuel Use in Canada, 1990-1995	25
3.5	Canada's Greenhouse Gas Emissions from Non-Energy Sources, 1990-1995	25
4.1	NAPCC: Identified Quantifiable Initiatives	35
4.2	End-Use Sector: Impact of Initiatives on Greenhouse Gas Emissions	37
4.3	The Gap – Greenhouse Gas Emissions in 2000 vs. 1990	39
5.1	Energy Pricing Assumptions	44
5.2	Macroeconomic Assumptions	45
5.3	Current Policy – Some Important Elements	46
5.4	Sensitivity Analysis: Projected Change in Greenhouse Gas Emissions Relative to 1990	51
