CPDPP Webinar Series

Asthma and COPD in SK: Your Role in Enhancing Respiratory Care

Learning Objectives:

- Identify patients who may benefit from spirometry, and describe how and where to refer
- Explain the role of Pulmonary Rehab, and describe when, how, and where to refer
- Explain the role of Certified Respiratory Educators, and describe when, how, and where to refer
- Demonstrate the new inhalation devices, and identify teaching points to ensure adequate inhaled drug delivery
- Identify available respiratory resources

Presented by Donna Turner

Donna Turner is a Respiratory Therapist and Certified Respiratory Educator in Prince Albert. She completed her diploma in Respiratory Therapy at SAIT in Calgary and moved to Prince Albert to work in acute care after graduation. Over the years, she took the REspTrec programs offered through the Lung Association of Saskatchewan and later achieved her Certified Respiratory Educator designation. She is now working full time at the Cooperative Health Centre, a Primary Care clinic, providing spirometry, respiratory evaluation and education to patients with respiratory disorders. She also teaches the RespTrec programs with the Lung Association of Sask.

Accredited by CPDPP providing 1.0 CEU for both pharmacists and pharmacy technicians
