Saskatchewan Child Growth and Development Study
SGDS I  1964-1973

Publications

Chapters in Books:

**Papers in Refereed Journals**

**Papers in Non-Refereed Journals**

**Invited Papers in Published Conference Proceedings and Abstracts**

Contributed Papers in Published Conference Proceedings and Abstracts

Master of Science Theses

LEPP, Edward Ron, 1968 B.A.(P.E.), B.Ed. (U of S)
Relationship of Social Status to Selected Physiological Function, Strength, General Performance, and Anthropometric Measurements in Ten Year Old Boys.

TAMM, Judith Ann, 1969 B.Ed.(P.E.) (McGill)
Maturation and Physiological Response to Exercise of Eleven-Year-Old Boys.

The Relationship Between Habitual Physical Activity and Maturity in a Group of Eleven-Year-Old Boys.

GIRSBERGER, Valerie Ann, 1972 B.Sc., B.A.(P.E.) (U of S)
The Physiological Response to Maximal Exertion of Young Girls, Aged 8 to 11 Years, With Special Reference to Max VO\textsubscript{2}. A Longitudinal and Cross Sectional Approach.

MEDHURST, Bruce Wayne James, 1972 B.A., B.A.(P.E.) (U of S)
A Longitudinal Examination of Strength of Boys 10 and 14 Years.
ELLIS, John David, 1974 B.Sc.(P.E.) (Guelph)
Longitudinal Analysis of the Standing Broad Jump, Flexed Arm Hang, and Sit Ups of Boys Ten through Fifteen Years of Age.

SMITH, Diane Margaret, 1975 B.P.E. (Calgary)
Relationships of Activity to Physiological, Anthropometric and Performance Parameters in Girls, From 7 to 12.

NOSEWORTHY, Ronald Gordon, 1982 B.P.E. (Memorial)
A Longitudinal Comparison of Boys for Selected Anthropometric and Physical Fitness Variables in Three Academic Achievement Groups.

GOMES, Paulo Sergio Chagas, 1984 B.Sc. (Fed. Univ., Rio de Janeiro)
Differential Growth in Body Segments and Widths in Boys Studied Longitudinally from 7 to 16 Years of Age.

TONER, Thomas E.M., 1987
A Longitudinal Examination of Respiratory Responses to Exercise in boys Age 8 to 16 and Girls Age 8 to 13 Years

POLEGATO, Ellen Patricia, 1987
Cardiorespiratory Response of Females to Sub-maximal Work: A Longitudinal Study from Ages 8 to 12 Followed Up at Age 23.

Ph.D. Dissertations

MIRWALD, Robert Leo, 1973 B. Comm. (U. of S) M.Sc. (U of Oregon)
A Longitudinal Investigation of Maximal Aerobic Power in Boys Ages 8-15 Years.

A Longitudinal Investigation of Selected Variables in Physically Active and Inactive Boys Studied During Their Circumpubertal Years.
