NURS 815 02 (28235) BB

- NURS 891** should be taken in your **first** term
- You should take your graduate level statistics course either before or concurrent with your NURS 892 course for greater success. A list of courses accepted for the statistics requirement is available from grad.nursing@usask.ca
- NURS 882 - 02** (22578) or **22** (27305) is the practicum. The professor teaching this course will meet for one webconferenced meeting in the last month of the previous term prior to class term. There are no further in person meetings.
- Thesis** students **must** register in NURS 994 in every term of their program as required by the College of Graduate Studies & Research (CRNs Term 1 – 82760, Term 2 - 22583, Term 3, 40555)
- NURS 812 and 813 - can be used as a nursing elective in the **thesis** option. Students in thesis and course-based need to take one elective course to round out their program.
- Course-based students are required to take the NURS 993 as the capstone to their program at the end of your program. The CRNs are Term 2 – 87961 and Term 3 – 40871
- If you do not have any classes available in summer, you need to register Maintenance of Status – MSTA. Contact graduate administrative assistant for help in registering in this course
