Describe Your Bio-Business Idea:

What is your idea? Does it address a problem in the market, create efficiencies, improve processes, and/or reduce environmental impact?

How will your business add value to Saskatchewan's Bio-Economy?

Briefly tell us what your / your team's qualifications in this area?

At what stage would you consider your business?

For example:

Do you have a rough business plan

Do you currently conduct business?

Is more development / research required on your potential product/service?

Have you developed a prototype or tested the market?

Are there current Investors?

What will the funding be used for? (these costs must be for Business Start-Up expenses not further development of the technology)

Describe The Target Markets You Have Identified:

What do you see as long-term opportunities for Your Product / Process?

Have You Identified Any Spin-Off or Support Industries / Opportunities That Could Result From Your Business Or Process?

Where do you see your company locating and what would be the reasons?

From a Saskatchewan base, what is your proximity to customers and access to needed resources?
