

Arts & Science Entrepreneurship Minor

Why choose a minor in Entrepreneurship?

Entrepreneurship is a way of thinking. It is how we can make things better, improve situations, and become more creative, innovative and unconventional. Today, for-profit and non-profit organizations want people who can think and act this way.

Whether you desire to be self-employed or work for an organization, an entrepreneurial spirit is a must. The entrepreneurship minor will help you get your business started and will provide knowledge of business and management skills. In addition, taking the entrepreneurship minor is a great way to round out and diversify an Arts & Science education.

The courses are designed to help you learn about entrepreneurship and management in an applied way. Students who have entrepreneurial aspirations are encouraged to work on their enterprise ideas throughout all of the courses, completing a business plan in the final capstone course. Students who do not have their own enterprise idea will be matched with entrepreneurial clients (for-profit or not-for-profit) to help them start or grow their entities. **The Entrepreneurship Minor consists of 21 credit units.**

Admission Requirements

The Arts & Science Entrepreneurship Minor is available to all students currently enrolled in the Bachelor of Arts and Bachelor of Science degree, BFA and BMUS Program Type A (Humanities), B (Social Sciences), C (Natural Sciences) and D (Fine Arts) through the College of Arts & Science.
