In June 2018, the Graduate Programs Committee (GPC) considered a proposal to clarify that a thesis-based master's degree would be required for admission to a Doctor of Philosophy (Ph.D.) program in Mechanical Engineering. In addition, the “or equivalent” language would be removed to avoid any misunderstanding. The intent had always been that a thesis-based master’s degree would be required for admission, and this clarification will be helpful for potential applicants.

The GPC passed the following motion unanimously:

To recommend approval of the clarification that a thesis-based master's degree is required for admission to the Ph.D. program in Mechanical Engineering. Kulshreshtha/Whiting CARRIED

MEMORANUM

To: Kelly Clement, College of Graduate & Postdoctoral Studies
From: Prof. David Torvi, Head, Department of Mechanical Engineering
Date: May 14, 2018
Re: Admission Requirements for Mechanical Engineering PhD program

It has recently come to our attention that the admission requirements for the PhD program in our department that are stated in the Course and Program catalogue are inconsistent with the information that is provided in other portions of the CGPS website. In December, 2012 we had requested two changes to information on the admission requirements for the PhD program, namely clarifying that applicants require a thesis-based Master’s degree and a cumulative weighted average of at least 70% (UofS grade system equivalent) for admission. While both of these changes have been incorporated within the information on the CGPS's "find a program" pages (https://grad.usask.ca/programs/find-a-program.php), the requirement for a thesis-based Master’s is not included in the admission requirements in the catalogue. Therefore, I am requesting that our PhD program admission requirements in the catalogue be revised.

The department requires applicants to our PhD program to hold a thesis-based Master’s as a demonstration of their research skills and their potential to successfully complete a PhD program. In our discipline, some students will complete a project-based Master’s (such as our MEng program). However, the project and report associated with these programs are considerably less rigorous than the research project and thesis associated with our MSc (or similar programs). For example, we expect our MSc students to spend 16 months on their research project and thesis as compared to four months on a MEng project and report.

Could you please revise our PhD admission requirements to read as shown below. The proposed changes (shown in red) would be to add “thesis-based” and to remove “or equivalent”.

Doctor of Philosophy (Ph.D.)

Admission Requirements

• Master’s degree (thesis-based), or equivalent, from a recognized university in a relevant academic discipline
• a cumulative weighted average of at least a 70% (U of S grade system equivalent) in the last two years of study (i.e. coursework required in Master’s program)
• Language Proficiency Requirements: Proof of English proficiency may be required for international applicants and for applicants whose first language is not English. See the College of Graduate and Postdoctoral Studies Academic Information and Policies in this Catalogue for more information

Please let me know if you require any further information on this change.

Sincerely,

David Torvi, Ph.D., P.Eng.
